眼球与切面、解剖工具台，以及猪的固定／解剖示意，来自不同章节和页码，却在Geminus中共享同一图面。很适合讨论重新分类与观看关系。

来源与使用说明

图像来源：Vesalius《Fabrica》1543年Basel副本；《Epitome》1543年Wellcome副本；Geminus为NYPL与Wellcome所藏1545年版。不同年份的英文版不混作本次图像证据。

历史操作：Geminus重画、重刻并重排了图像；没有证据表明他像当代纸上拼贴一样直接裁切Vesalius纸本。原页文字不出现在图版上，也不等于它从整本书中消失。

副本差异：Basel本中的着色、装饰，以及馆藏纸色、污点和扫描边框，不应自动算作Geminus删除的内容。

分辨率：NYPL参考图约760像素长边；资料包另附38张Wellcome同版3000像素宽图、16张Vesalius全尺寸图。其他Vesalius页为参考图，并附全尺寸馆藏链接。

索引：资料包index.html可离线浏览；CSV与JSON包含全部对应关系。4组局部来源待核对。p.与scan分别标识书内页码和本次使用的扫描序号。

研究界限：这里记录可见的构图变化，未将所有重刻线条变化逐一列出，也未进行逐句拉丁文本校勘。
